Avinash Kumar **Email – avinashvidyarthi@gmail.com**
Cloud & DevOps Engineer **Contact - +91-7765034079**

Portfolio: https://avinashvidyarthi.github.io

Professional Summary:

Experienced Cloud Engineer with a ~5-year track record in Cloud Security and DevOps. Expertise lies in architecting, implementing, and optimizing AWS and GCP cloud solutions. Proficient in Terraform, Git, and Linux, specializing in workflow automation, high availability, and scalability. Proven ability to troubleshoot complex issues and dedicated to continuous learning. Results-driven with a commitment to fostering organizational success in dynamic environments.

Technical Skills:

- **Cloud Technologies:** GCP, AWS
- **Scripting Language:** JavaScript, Python, Bash
- **Infrastructure as a code:** Terraform
- **Containerization/DevOps:** Docker, CICD, Kubernetes, GitHub Actions, GCP Cloud Build, AWS Code pipeline & build
- **Monitoring Tools:** AWS CloudWatch, GCP Cloud Logging & Monitoring
- **Operating Systems:** Linux, Windows Server
- **Web Servers:** Apache, Nginx
- **Version Control:** GitHub, BitBucket, CodeCommit

Certifications:

- Google Certified Cloud Architect - Professional
- Google Certified DevOps Engineer - Professional
- Google Certified Database Engineer - Professional
- AWS Certified Solution Architect – Associate

Work Experience:

1. **Quantiphi Analytics (Sr Platform Engineer)** (Sept 2024 - Present)

   Project 1: Data migration from Oracle to BQ for Lumen

   - Setup Git repos and Jenkins pipeline to deploy Airflow DAGs, PySpark scripts and BigQuery DDLs.

- Worked on migrating data from Genesys Websockets to BQ using a custom Python script handling around ~30 million records per day.
- Worked on creating architecture to migrate data from Redis server to BQ in near real time.

Project 2: Landing Zone Setup for Ford-BOBM

- Worked on creating landing zones on GCP for BOBM using Terraform and GCP's cloud foundation toolkit.
- Created centralized networking with Greenfield and Brownfield implementation.

Project 3: SAP to BQ migration for Saudi Aramco

- Worked on infrastructure provisioning for SAP to BQ migration.
- Worked on a POC on creating a dashboard for data stored in BQ using Looker.

2. **CloudThat Technologies (Sr Research Associate)** (January 2023 – Sept 2024)

Project 1: Infrastructure Automation & Creation for IOCL

- Led the infra creation and maintenance in collaboration with Accenture
- Implemented Infrastructure as Code (IAC) using **Terraform** for automated provisioning of **VMs, networking**, and **EKS clusters**
- Established **CodeCommit** for version control and **CI/CD pipelines**, promoting collaborative development and automated deployment

Project 2: Infra migration and upgradation for IIM Calcutta

- Led the infrastructure migration for IIM Calcutta's student portal
- Seamless migration of old databases and user files to AWS cloud
- Upgradation of the old versions of the software to the latest one

3. **Cognizant (Programmer Analyst)** (July 2021 - Jan 2023)
   - Providing technical support for GCP users.
   - Worked as a vendor for Google as technical support representative for GCP
   - Part of the pilot program with Google
   - Automating ticketing workflow for efficient ticket handling

Education Qualification:

- B.Tech in Computer Science & Engineering (2017-2021)
  - GIET University (Gunupur) Odisha (CGPA- 9.18)
- XIIth (2014-2016)
  - K.L.S College, Nawada, Bihar (Percentage - 70%)
- Xth (2014)
  - T.M.V.M Pawapuri, Bihar (CGPA - 9.8)
